OVERVIEW

- Title: MOSAIC-lens
- Use case:
 - Short description: Google Lens like software
 - Addressed problem: Search using phone camera
 - Targeted end user: People who want to know something
 - Business opportunities: Gruendungsgarage

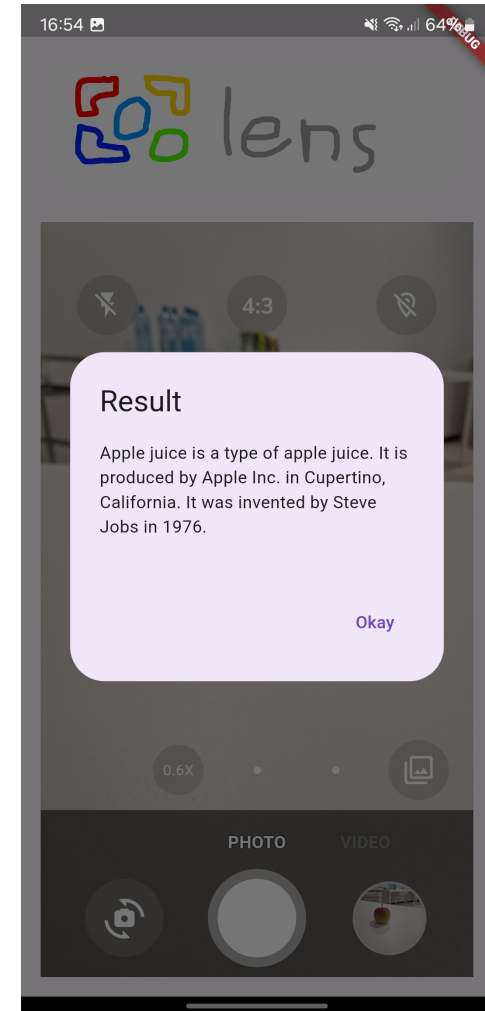

TECHNICAL BACKGROUND

- Development level:
 - Conceptual design: available
 - Development: available
 - Demonstrator: available
- Technical implementation:
 - Used index: existing index
 - Front-end: new front end for android
 - Data analysis performed: yes
 - Search Service: existing one used
 - Large Language model used: yes

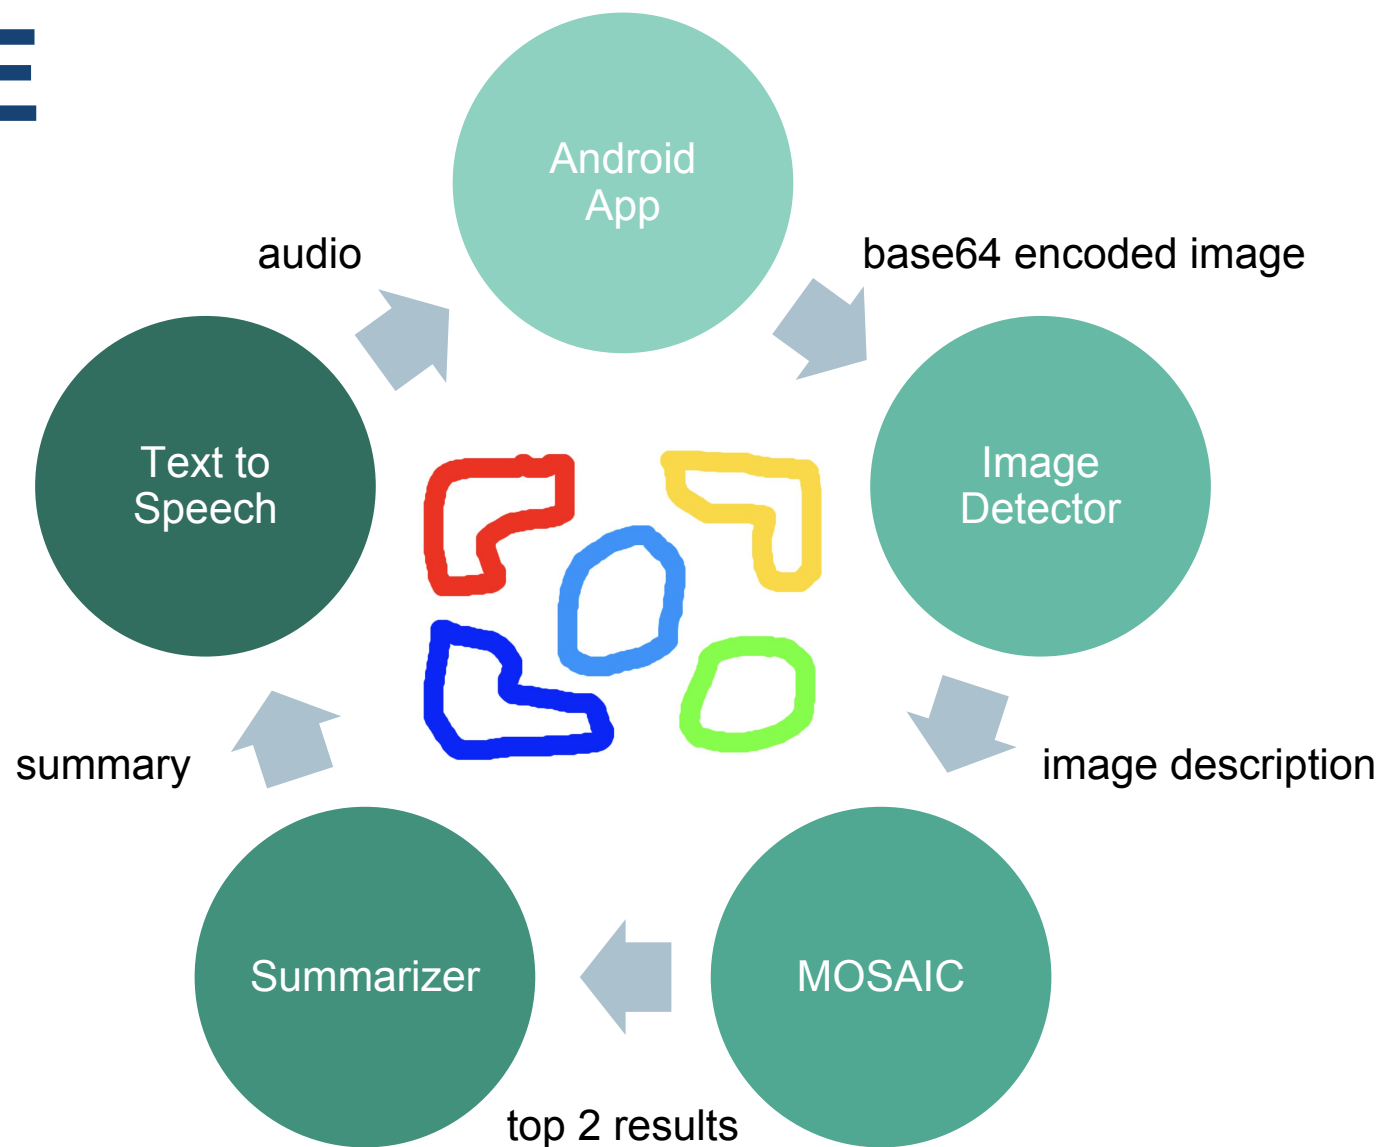

PROJECT PRESENTATION

about 10 seconds

PIPELINE

Live Presentation

DLP-Analysis BERTopic

- Dataset: News Articles (focus on environmental catastrophes)
- BERTopic Results:

	Topic	Count	Name
0	-1	146	-1_map_global_imag_flood
1	0	97	0_flood_the_river_water
2	1	79	1_fire_burn_imag_nasa
3	2	48	2_storm_imag_earth_nasa
4	3	36	3_applic_like_view_read
5	4	27	4_earth_observ_our_program

- Pipeline:
Plain-Text → Topic-List → new .parquet file

Documents and Topics

DLP-Analysis BERTopic

- Can be used for new filtering option
- **Future work:**
Use the visual tool in combination with a specific topic for better search results and summaries
